Explore the idea of creation of the world through the Sacred Words of Power that sprang from the lips and the heart of the Divine. We study the ancient Egyptian idea of manifestation as it flows from the Divine into the physical world. By working with the divine on a consciousness level, we begin the task of co-creation of the universe. We will learn the many sacred forms that Spirit takes in Nature through what we know as the bodies of the gods and goddesses. The class will explore the subtle layers of meaning of these divine names. Through this process we tap into dream realms, the secret longings of the heart, and the power of Logos in image and in sound. Spirit is manifest through our lives and this workshop explores multidimensional ways of expression that are equivalent to the ancient Egyptian scribe's process of hieroglyphic thinking and tapping into the metaphysical realm of the words of power.
